---

### **Alternative solutions to nuclear energy**

Friday, September 14, Barrick Museum Auditorium, 6-9 p.m.

This Town Hall meeting will focus on alternative solutions to nuclear energy. Dr. Robert Boehm, UNLV professor in mechanical energy, will host this informative session. Solar, wind, geothermal, utility company and mechanical engineering alternatives will be addressed. Experts in each of these areas will give a short presentation on these energy alternatives, followed by a question and answer session. Speakers to be announced at a later date.

### **Yucca Mountain history – Selection process/pre-1987 history**

Friday, October 19, Classroom Building Complex (CBC), A-106, 6-8 p.m.

This Town Hall meeting will focus on providing context regarding the history and selection of Yucca Mountain as the nuclear waste depository of the United States. Former Senator and Governor of Nevada, Richard Bryan, is tentatively scheduled to provide the audience with his insights and opinions regarding the political processes involved in this decision.

**Nuclearism and Nevada – The “politics of science” and  
the post-1987 of Yucca Mountain history**

Friday, November 30, 2001, Barrick Museum Auditorium, 6-9 p.m.

This Town Hall meeting will focus on the history of nuclearism in Nevada, especially the recent history, science, and politics surrounding the Yucca Mountain site. Speakers will be announced at a later date.

Further information on each of these Town Hall meetings will be available on the YMEP website. Please check occasionally for updates.

\*The Yucca Mountain Education Project is a multidisciplinary effort by interested faculty and staff of the University of Nevada, Las Vegas to create a balanced information resource for the general public on the subject of the proposed Yucca Mountain high-level radioactive waste disposal site. The ultimate goal of the project is to present the positive and negative aspects of the proposed waste site so that the general public can make informed political decisions.
